

Vitamin D Assay Testing Payment Policy

Line of Business: MDwise Medicaid – Hoosier Healthwise and Healthy Indiana Plan

Effective Date: 11/01/25

This policy applies to Vitamin D Assay testing services. If there is a conflict between this policy and applicable federal or state laws, regulations or regulatory requirements, the applicable laws or regulations will control. Further, if there is a conflict between this policy and a provider contract, the provider contract will govern. Note – coverage may be mandated by FSSA or CMS.

Providers are required to submit accurate claims and documentation for all services performed.

Providers must submit claims using valid code combinations required by applicable law. Claims should be coded appropriately according to industry standard coding guidelines. All claims are subject to claim edits and may be subject to further reviews by MDwise or contracted third parties. Providers are expected to promptly work with MDwise and any third parties to provide any requested information related to a claim submission.

Description and Definitions

Vitamin D is a hormone, synthesized by the skin, the liver, and then metabolized by the kidney to an active hormone, calcitriol. An excess of vitamin D may lead to hypercalcemia. Vitamin D deficiency may lead to a variety of disorders. Evaluating the status of a patient's Vitamin D sufficiency is accomplished by measuring the level of 25-hydroxyvitamin D. Measurement of other metabolites is generally not necessary outside of several unusual metabolic bone disorders or chronic kidney disease-mineral bone disorder (CKD-MBD).

- **Vitamin D, 25-hydroxy Test (CPT Code 82306)** measures vitamin D deficiency and is indicated for patients with conditions, including but not limited to chronic kidney disease, hypercalcemia, hypocalcemia, hypervitaminosis D, or osteomalacia and is not generally used for routine screening of the general population. A full list of diagnosis is included in Attachment A.
- **Vitamin D; 1,25-dihydroxy Test (CPT Code 82652)** measures vitamin D deficiency or excess. 1,25-dihydroxyvitamin D is the active form of Vitamin D and is indicated for patients with conditions, including but not limited to primary hyperparathyroidism, renal failure and is generally not used for routine screening of the general population. A full list of diagnosis is included in Attachment B.

Reimbursement Policy

MDwise reimburses Vitamin D Assay testing when a covered diagnosis is present for CPT Code 82306 or 82652 as described in this policy. MDwise does not cover Vitamin D Assay testing as a routine screening. Limitations, in accordance with CMS Ruling 95-1 (V. Acceptable Standards of Practice – Application), utilization of these services should be consistent with locally acceptable standards of practice.

These services are to be reimbursed once in a 24-hour period when medically necessary.

Audit

MDwise or a third party may audit or otherwise review all paid claims to ensure the integrity of the paid claims. This includes, but is not limited to coding validation, payment accuracy, compliance with regulations, policies, and contractual requirements. These reviews include clinical claim reviews and payment analytics.
